

# THE ULTIMATE SOLUTION FOR HAIR REMOVAL

*Laser Hair Removal is simple and pain free at ESTETIKA writes Julienne Schembri Wismayer.*

How often have you come across someone who said they have done laser hair removal and you wonder to yourself: does it really work? Will it cost me too much? Is it truly permanent? Even though the person who has done it reassures you and looks very content with the results, doubts still linger in your head.

Well, I can tell you, I was one of those people too and as always, the best and only way to get the answers you want is to try it out yourself. Oh how silly now I feel to have endured years and years of spending money on trying out different products, reaching out for a razor at the last minute in a rush before a swim, waiting for a waxing appointment, always looking out for new methods when, right under my very nose, laser hair removal was available all along!

## THE APPOINTMENT

After hearing many positive things about laser hair removal and many phrases like 'try it, you won't regret it', I phoned *Estetika* in Sliema to get some more information. The first thing I was told to do was attend a consultation at the clinic for the courteous laser nurse to establish my hair type, skin tone and have a test patch done prior to actually starting the treatment. After this I started the course of treatments. This meant a huge load off my shoulders, having the freedom and confidence to just go out wherever and whenever I pleased, permanently hair free without endless preparation.

Laser hair removal can be used on any part of the body including the face. It is a gentle method permanently destroying the hair follicle by a beam of light that passes through the skin, without causing any damage. I was advised that although a slight pinkness or redness can appear on the treated area, this vanishes completely soon after the treatment is completed. It gives longer lasting effects and over the span of a treatment

programme, the total hair on the area treated will be permanently and drastically reduced.

## APPLICATIONS

Many body builders, swimmers and other types of athletes prefer to have a cleanly shaved body and laser treatment can be the perfect option for them. Not only does it save time, it looks much better than having stubble growing out within a few days. Laser creates a clean, fresh look and it stays that way.

While razors, waxing and electrolysis can help, hair quickly grows back, which we all know is a big drawback because one is not really solving the problem or achieving permanent results.

*Estetika* uses the latest hair removal techniques which take only a fraction of the time needed by other methods. *Estetika's* laser hair removal helps save time and money in the long run, apart from the convenience and benefits to your image and lifestyle.

I am now the one telling people: go on, try it, you won't regret it, and with one huge hassle-free smile on my face, I really mean it!
